Name of Student: Rikisha Bhattacharya	**PRN: 25070122155**
Semester: III	**Year: AY 2026-27**
Subject: Programming with Java	
ASSIGNMENT No: 12	
TITLE: User-Defined Packages	

Problem Statement

Write a Java program to create and use user-defined packages.

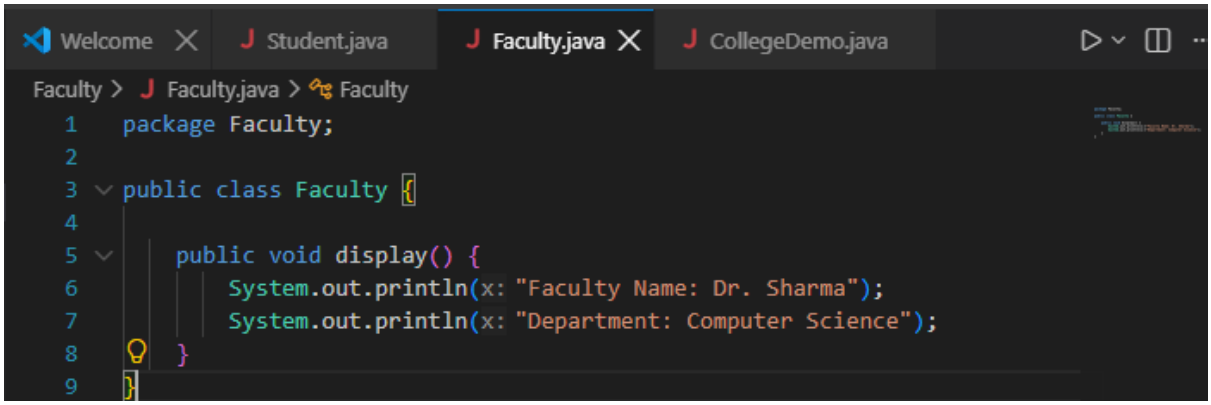

Learning Objectives

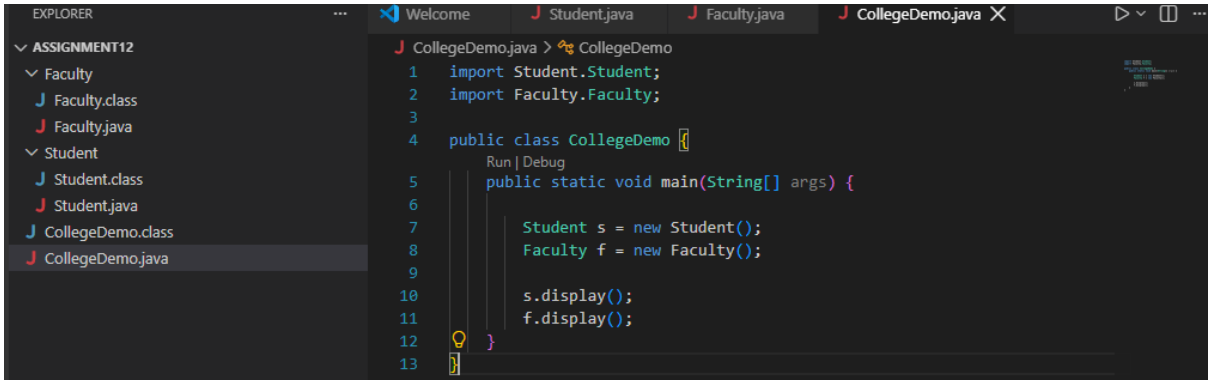

To create and use user-defined packages for organizing Java programs.

1. Create a Java program by developing user-defined packages for a College Management System. Create separate packages for student and faculty details, and display their information using classes from these packages.

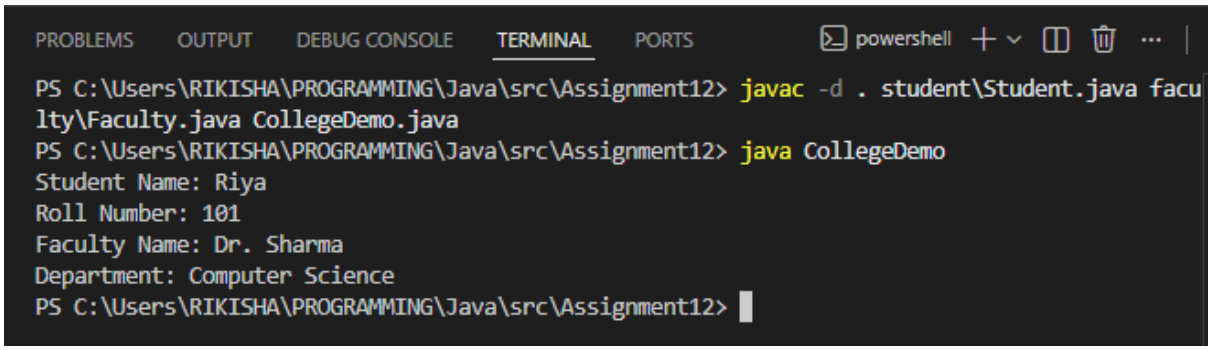

Programme

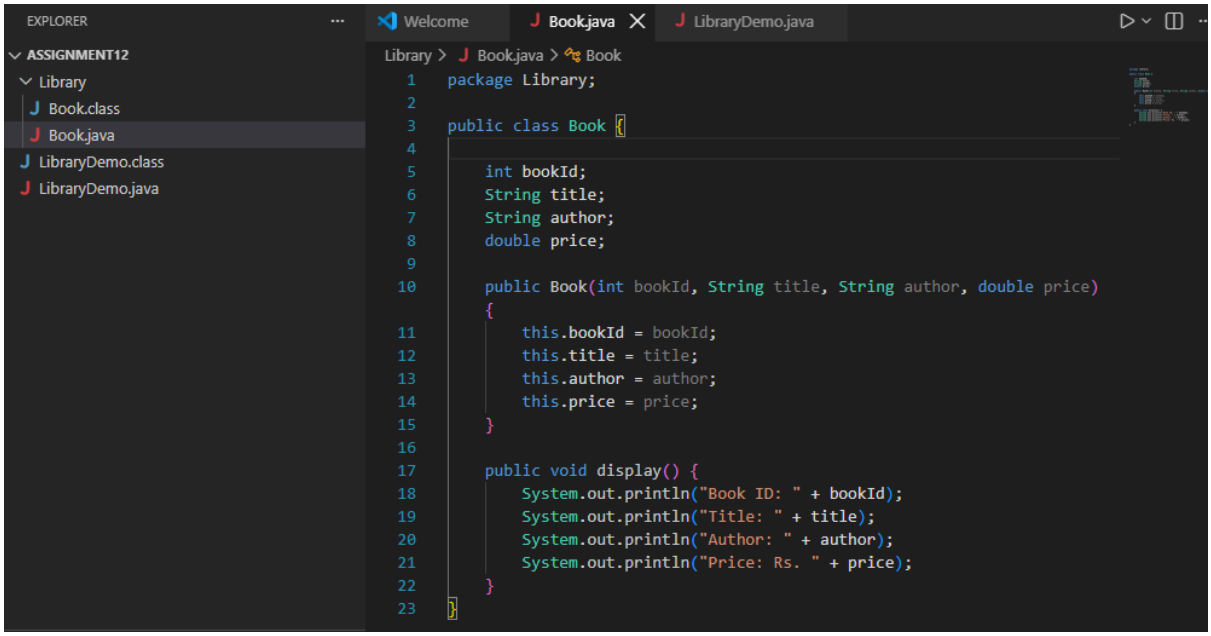

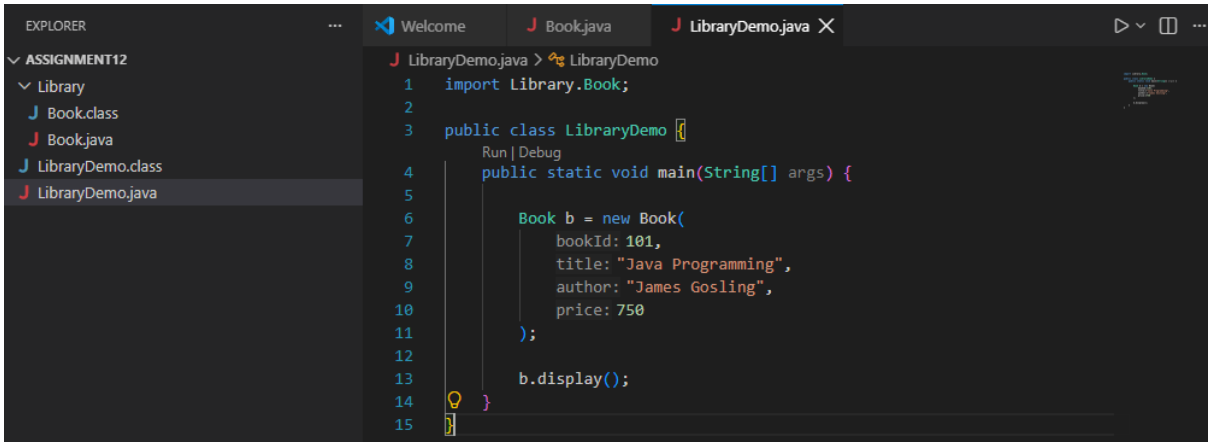

Output

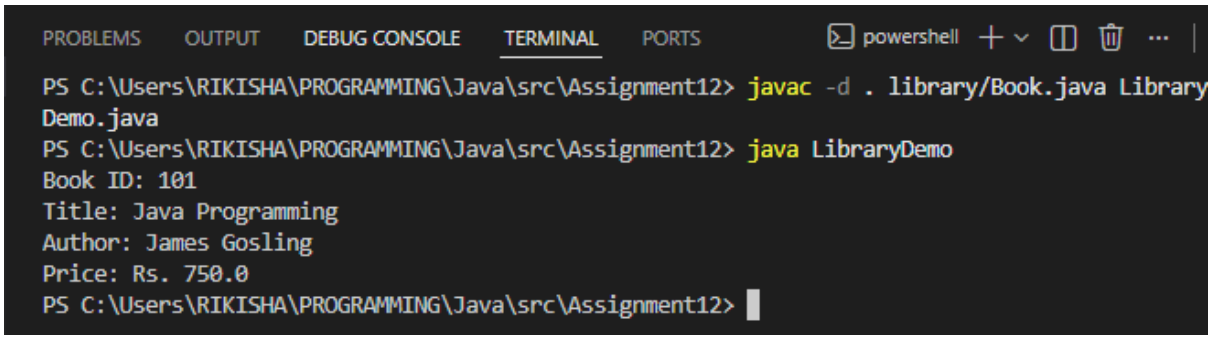

2. Create a Java program by developing a user-defined package named library that contains a class to store and display book details such as book ID, title, author, and price. Import the package into the main program and display the book information.

Programme

Output

Conclusion

The programs demonstrate the creation and use of user-defined packages in Java. Packages organize related classes, prevent naming conflicts, and improve code reusability and maintainability.
